
What is civil engineering?

Posted by RyanG - 2007/05/31 23:12

I have a similar question found

http://answers.yahoo.com/question/index;_ylt=Ap3wkNuu5LTOAB24E317TZkjzKIX?qid=20070526051741AAFJEvO

Briefly

1. Difference between Civil Engineering and just plain Engineering?

No one has answered this question, searched around the internet for a engineering forum.

Thanks RG

Civil engineering is a branch of the engineering field dealing with design of infrastructure, such as roads, bridges, storm water pipes, drinking water systems, and sewer systems, among others. Deals with earth, water, and civilization, and their processes.

Other types of engineering include electrical, mechanical, aerospace, industrial, etc.
